Support the Mental Health Access Improvement Act (S. 828/H.R. 432)!

Thank you to everyone that participated and engaged in the **Virtual Action Day** on September 14! Counselors came out in force to advocate for Medicare recognition. **Over 500 messages were sent** through our Grassroots Community as part of the campaign. It is clear that counselors are ready and willing to serve Medicare beneficiaries.

If you were not able to participate yesterday, there is still time to tweet and post on Facebook to your members of Congress in support of licensed mental health counselors (MHCs) and marriage and family therapists (MFTs) across the country. **The Medicare Mental Health Workforce Coalition needs your help in advancing the Mental Health Access Improvement Act (S. 828/H.R. 432) and securing Medicare recognition for mental health counselors.**

Visit our [Medicare Mental Health Workforce Coalition page](#) to find more ways to contact your representatives through emails and phone calls, or learn about assisting in writing an op-ed.

Check out our [Facebook](#) page for posts about the Virtual Action Day and help us get the word out on **#MedicareMentalHealth** and **#SeniorsMentalHealth!** This bill needs your support to pass! Make your voice heard with your members of Congress today!
